

📦 APP STORE METADATA - PINGCHEKKER

Version: 1.0.0 **Author:** Gatot Logic

1. APP IDENTITY (Universal)

App Name (30 Characters Max): PingChekker: Network Monitor

Privacy Policy (Text for your Website/Notion):

[Privacy Policy for PingChekker](#)

Effective Date: November 30, 2025

We believe in privacy by design. **PingChekker does not collect, store, share, or transmit any personal user data.**

1. **No Tracking:** We do not use any third-party analytics or tracking SDKs.
2. **Local Storage:** Your network history logs (latency, MOS score, WiFi name) are stored locally on your device using Apple's Core Data framework. This data never leaves your Mac.
3. **Location Permission:** The app requests Location access solely to identify the name (SSID) of your current Wi-Fi network for your history logs. This data is processed locally and is not shared.
4. **Network Access:** The app uses outgoing network connections solely to ping the target host (e.g., 8.8.8.8) to measure latency.

If you delete the app, all local data is permanently removed.

2. ENGLISH (Global Market)

Target: Remote Workers, Gamers, Streamers.

Subtitle (30 Characters Max): Real-time Latency & MOS Stats

Promotional Text (170 Characters Max): Stop guessing why you're lagging. Monitor your real-time latency, jitter, and connection quality score directly from your menu bar. Lightweight & privacy-focused.

Keywords (100 Characters Max - Comma Separated, No Spaces):

ping, latency, network, speed, test, wifi, jitter, monitor, menu
bar, utility, mos, voip, gaming, lag, status

Description: Is your internet acting up during a crucial Zoom call? Are you experiencing rubber-banding in your favorite online game?

Stop guessing. Start knowing.

PingChekker is a native macOS utility designed to give you peace of mind. It lives quietly in your menu bar, providing real-time visibility into your connection stability without the need to run complex terminal commands or open heavy browser speed tests.

CORE FEATURES:

 **Real-Time Traffic Light System** Instantly know your connection status just by glancing at the menu bar icon.

- Green: Perfect for gaming & calls.
- Yellow: Usable but unstable.
- Red: Critical lag or offline.

 **Beyond Just "Ping"** We don't just measure latency. PingChekker calculates your **MOS (Mean Opinion Score)** based on industry-standard E-Models. It analyzes Latency, Jitter, and Packet Loss to give you a quality score from 1.0 to 5.0.

 **Automatic History Logging** The app automatically detects when you switch networks or experience a disconnection. It saves a snapshot of your session, so you have proof of performance when complaining to your ISP.

WHY PINGCHEKKER?

- **Native & Lightweight:** Built with SwiftUI and Core Data. Uses negligible RAM and CPU.
- **Privacy First:** No tracking, no analytics, no servers. Your data stays on your Mac.
- **Adaptive UI:** Beautiful native design that looks great in both Light and Dark modes.

Perfect for:

- **Gamers:** Check your ping before queuing for a ranked match.
- **Remote Workers:** Verify stability before joining a video conference.
- **Streamers:** Monitor connection health in real-time.

Stop blaming the server. Check your ping.

3. INDONESIA (Local Market)

Target: User WiFi Rumahan, Cafe Hopper, Pejuang Sinyal.

Subtitle (30 Characters Max): Cek Ping & Kualitas WiFi

Promotional Text (170 Characters Max): Internet lemot atau game nge-lag? Cek kondisi ping, jitter, dan kualitas jaringanmu secara realtime langsung dari menu bar. Ringan, akurat, dan tanpa iklan.

Keywords (100 Characters Max - Comma Separated, No Spaces):

ping,cek,internet,jaringan,wifi,latensi,lag,game,monitor,kecepatan,stabil,menu
bar,alat,indihome

Description: Lagi asik push rank tiba-tiba "Request Timed Out"? Lagi presentasi online tiba-tiba suara putus-putus?

Jangan nebak-nebak. Cek pasti dengan PingChekker.

PingChekker adalah aplikasi utilitas macOS yang wajib punya buat kamu yang butuh kepastian koneksi. Gak perlu lagi repot buka Terminal ketik "ping google.com" terus-terusan. Aplikasi ini nempel di Menu Bar kamu, ngasih tau kondisi internet detik ini juga.

FITUR UTAMA:

● Indikator Lampu Lalu Lintas

- Cukup lirik ke atas layar.
- Ikon Hijau: Gas! Aman buat main game & meeting.
 - Ikon Kuning: Hati-hati, sinyal mulai goyang.
 - Ikon Merah: Bahaya! Mending tunda dulu match-nya.

📊 Lebih Dari Sekadar Ping

Ping kecil doang gak jaminan lancar kalau **Jitter** (kestabilan)-nya hancur. PingChekker menghitung skor kualitas **MOS (1.0 - 5.0)** secara otomatis. Kamu jadi tau internetmu beneran bagus atau cuma "kelihatannya" bagus.

📝 Riwayat Otomatis (History)

Pindah dari WiFi rumah ke Tethering HP? Atau WiFi cafe mati nyala? PingChekker otomatis mencatat riwayat performa setiap jaringan yang kamu pakai. Berguna banget buat bukti komplain kalau internet kamu sering gangguan di jam tertentu.

KENAPA PINGCHEKKER?

- **Ringan Banget:** Dibuat khusus buat Mac (Native). Gak bikin laptop panas atau baterai boros.
- **Privasi Aman:** Gak ada data yang dikirim ke server kita. Semua history tersimpan di laptop kamu sendiri.
- **Tampilan Ganteng:** Desain modern ala macOS yang enak dipandang.

Cocok Buat Siapa?

- **Gamer:** Pastikan ping hijau sebelum klik "Find Match".
- **Work From Anywhere:** Pastikan WiFi cafe stabil sebelum mulai kerja.
- **Siapa saja:** Yang capek dibohongi sinyal WiFi penuh tapi internetnya lemot.

Download sekarang. Internet stabil adalah hak segala bangsa.

4. WHAT'S NEW (Release Notes)

Version 1.0.0

- Initial Release!
- Introducing the Real-time Latency Monitor in your Menu Bar.
- Detailed Dashboard with MOS (Mean Opinion Score) Quality Calculator.
- Smart History Log: Automatically saves your session stats when you disconnect or switch networks.
- Native macOS design with Dark Mode support.
